**Autorska prava za bibliotekare**

**Предговор**

**Циљеви**

„Autorska prava za bibliotekare” je zajednički projekat Berkman centra za Internet i društvo Univerziteta Harvarda (Berkman Center for Internet & Society) i konsorciјuma Electronic Information for Libraries (eIFL), koji čine bibliotekarke iz 50 zemalja Afrіke, Azіje i Evrope. Cilj projekta je da bibliotekarkama u zemaljama u razvoju i tranzicіji obezbеdi informacije koje se odnose na zakone o autorskoj pravu. Prezentacija, namenjena je da informише bibliotekarkе о:

- Zakonu о autorskoj pravnoj zaštiti
- Aspektima zakona о autorskoj pravnoj zaštiti koji najviše utичу na bibliotekarke,
- kako bi u budućnosti bibliotekarkama mogla najefikasnije da učestvuju u pravljenju u kojima se zakon о autorskoj pravnoj zaštiti interpretira i objavljuje.

**Kako koristiti ovaj kurs**

Materijali za kurs mogu se koristiti na tri različitа načina. Prvo, mogu biti osnova za samostalno učenje. Bibliotekarkе mogu da čitа materijal по redu или da se fokusirа na materijal koji se bave pitanjima koja ih interesuju.

Drugo, materijali za kurs se mogu koristiti u tradicionalnom kursu u učionici. U timskom okruženju, predavač ће одreditи teme kojima ће se materijal prezentirati и изабрати teme za diskusiju. Instruktorkе mogu koristiti pitanja koja su data на kraju svakog materijala, или postavljati nova pitanja. (Pitanja nisu prevedena na srpski језик, dostupna su само оцијани на engleskom језiku).

Treće и коначно, materijali se mogu koristiti kao курс na daljinu. Instruktorkе mogu kreirati, а bibliotekarkе koji je upotrebljavaju mogu učestvovati preko svог računara. Како би се povećao интерактивni у ovakvom okruženju, uklуčen је и program за diskusiju, prilagođeno razliјekom у Berkman Centru, koji se naziva Knowledge. Prilagođena za instruktorkе koji bi hteli da koriste ovaj program је dostupna на

# Autorsko pravo

**Nacionalni zakon o autorskom pravu štiti od bespravnog korišćenja pisana dela, baze podataka, softver, muzička dela, tonske zapise, koreografiju, likovna i arhitektonska dela.**

Zakon štiti i ekspresiju ideja, procedure, metode, koncepte, otkrića, izbor, uređivanje činjenica u bazama podataka, ali ne i same činjenice.

**Ideje nisu zaštićene, ali izražavanje ideja i umnožavanje autorskih dela jeste.**

# Autorsko pravo

**Zaštita autorskog dela počinje momentom njegovog fiksiranja u bilo kom mediju – papirnom, elektronskom, magnetnom itd.**

**Autor ima pravo na to da se delo uvek pripisuje njemu i da se čuva integritet dela (moralni aspekt). Da bi delo bilo publikovano (umnoženo i distribuirano), autori prenose ugovorom svoja prava na umnožavanje dela na izdavača (materijalni aspekt).**

**To ih može dovesti u nepovoljnu poziciju, da ne mogu da koriste sopstvene rezultate u nastavi, kasnijim radovima, na vebsajtu i sl.**

# Međunarodna regulativa

Većina država, uključujući Srbiju su potpisnice:

- **Pariske konvencije** za zaštitu industrijske svojine
- **Bernske konvencije** za zaštitu književnih i umetničkih dela,
- **Konvencije o osnivanju Svetske organizacije za intelektualnu svojinu**
- **Sporazuma o trgovinskim aspektima prava intelektualne svojine.**

# Bernska konvencija

Bernska konvencija je uspostavila tri osnovna principa:

- **Princip „nacionalnog tretiranja“**, koji traži da zemlje članice daju državljanima svih zemalja potpisnica ista prava prema zakonu o autorskim pravima koja daju svojim državljanima.
- Drugi je **princip „nezavisnosti“ zaštite**. Svaka zemlja članica mora da obezbedi istu zaštitu stranim delima koju daje domaćim, čak i ako strano delo ne bi bilo zaštićeno prema zakonu o autorskim pravima zemlje u kojoj je nastalo.
- Treći je **princip „automatske zaštite“**, koji zabranjuje zemljama članicama da traže neke prethodne zakonske uslove od lica iz drugih zemalja potpisnica Bernske konvencije kako bi dobili zaštitu autorskih prava.

# Bernska konvencija

**Minimum trajanja zaštite autorskih prava na umnožavanje dela, ratifikovan u najnovijoj verziji Bernske konvencije iz 1971, je tokom života autora plus 50 godina za sva dela osim dela primenjene umetnosti, gde je najmanje trajanje zaštite 25 godina.**

Bernska konvencija takođe traži od svojih potpisnica da prepoznaju i obezbede ograničeni podskup „moralnih prava“.

# WIPO ugovor

WIPO ugovor o autorskim pravima (WCT) je poseban sporazum u okviru Bernske konvencije koji je stupio na snagu 6. marta 2002, koji **traži da države obezbede zaštitu računarskih programa i baza podataka (kompilacija podataka i drugog materijala napravljene na originalan način).**

WCT zahteva i da članovi zabrane zaobilaženje tehničkih zaštitnih mera koje su postavili nosioci autorskih prava kako bi sprečili neovlašćeno kopiranje i distribuciju svojih dela.

# Trostepeni test (1967.)

**Test, definisan prilikom revizije Bernske konvencije, kojim se utvrđuje postojanje kršenja autorskih prava**

**"Biće stvar zakonodavstva u zemljama zajednice da dozvole reprodukovanje takvih dela [a] u određenim specijalnim slučajevima, uz obavezu da [b] takvo reprodukovanje nije u suprotnosti sa normalnom eksploatacijom dela i [c] ne oštećuje neopravdano legitimne interese autora."**

# **Sporazum o trgovinskim aspektima prava intelektualne svojine **TRIPS****

**TRIPS traži od zemalja potpisnica da obezbede zaštitu autorskih prava na računarske programe i kompilacije baza podataka. Za razliku od Bernske konvencije, TRIPS ne traži zaštitu moralnih prava autora.**

**TRIPS traži od zemalja potpisnica da obezbede efikasne sankcije za one koji krše autorska prava. Osim toga, TRIPS ima i mehanizam za rešavanje sporova pomoću kojeg članice Svetske trgovinske organizacije mogu da nateraju druge članice da se ponašaju u skladu sa svojim ugovornim obavezama.**

# Zakon o autorskim pravima RS

("Sl. glasnik RS", br. 104/2009, 99/2011 i 119/2012)

## Član 46

**Dozvoljeno je fizičkom licu da bez dozvole autora i bez plaćanja autorske naknade umnožava primerke objavljenog dela za lične nekomercijalne potrebe...**

Umnoženi primerci dela iz stava 1. ovog člana ne smeju se stavljati u promet niti koristiti za bilo koji drugi oblik javnog saopštavanja dela.

**Odredba stava 1. ovog člana ne odnosi se na:**

- 1) snimanje izvođenja, predstavljanja i prikazivanja dela;...
- 6) **umnožavanje pisanih dela u obimu cele knjige, osim ako su primerci te knjige rasprodati najmanje dve godine;**
- 7) umnožavanje notnih zapisa muzike, osim ručnim prepisivanjem.

# Izuzeci iz zakona RS, član 55

Bez dozvole autora, a uz obavezu plaćanja autorske naknade, dozvoljeno je, u obliku zbirke namenjene nastavi, ispitu ili naučnom istraživanju, umnožavanje na papiru ili sličnom nosaču, putem fotokopiranja ili bilo kojeg oblika fotografske ili slične tehnike koja daje slične rezultate, odlomaka objavljenih autorskih dela, pojedinačnih kratkih objavljenih autorskih dela u oblasti nauke, književnosti i muzike ili pojedinačnih objavljenih autorskih dela fotografije, likovne umetnosti, arhitekture, primenjene umetnosti, industrijskog i grafičkog dizajna i kartografije ako se radi o objavljenim delima više različitih autora, osim ako to autor izričito ne zabrani.

# Autorska prava za pisana dela

- **Nosioci su ili izdavači (oko 80%) ili autori**
- **Nasledna su i važe do 70 godina od smrti autora ili koautora**
- **Za mnoga dela iz 20. veka ne zna se ko je nosilac autorskog prava (izdavači više ne postoje, autorovi naslednici nisu poznati ...)**
- **Google je započeo sa skeniranjem svih knjiga iz fondova velikih biblioteka, ali su ga udruženi izdavači SAD tužili sudu ...**

# Autorski ugovori

**Većina izdavača, posebno komercijalnih, traži da autor prenese isključivo pravo na svoj rad na izdavača.**

**Ukoliko ugovor ne predviđa neke izuzetke, to znači da autor ako želi da pošalje kolegama ili studentima tekst, mora da traži odobrenje od izdavača, i da plati naknadu nosiocu autorskih prava – izdavaču!**

# Elementi ugovora

- Prenos prava na umnožavanje, **isključivog** (najčešće) ili **neisključivog**
- **Izuzeci od tog prava** (postavljanje preprinta ili postprinta rada na veb sajt autora, u institucionalni ili tematski repozitorijum)
- Definisane **embargo** perioda za tako postavljen rad
- **Izjava autora da je delo originalno i da nema neraščišćenih odnosa sa drugim autorima** (koautorima, autorima tabela, fotografija, crteža i sl.)

## Button-Based Public Domain Calculation

This page showcases the button-based version of the public domain calculator. After choosing a jurisdiction you will be guided through to several questions that help you to determine the copyright status of a work under review. These calculators are of the most basic kind, only using buttons to guide the user through the process. See the description of the software for more information on the various types of calculators.

**It should be noted that multiple layers of rights (whether of copyright, neighbouring or related rights or sui generis rights) might apply to the same information product. Please make sure that you correctly identify and apply the Public Domain Calculators to all subject matter that qualifies for protection.**

**It is recommended that all information boxes be carefully read prior to answering a question in the calculators.**

Where an event is mentioned in the calculator as the starting point for the calculation of a set number of years, for the purposes of the calculator, the event should be taken as occurring on the first day of January of the year following that in which it actually took place.

4. Dole potpisani izjavljuju da bilo koje lice koje se naziva koautorom Priloga je svesno pravila i slaže se sa njima. Dole potpisani potpisuje i prihvata odgovornost za prenošenja ovog prava na bilo kog ili na sve koautore. Dole potpisani izjavljuju da iskaz ili mišljenje dato u Prilogu su izraz Autora. Odgovornost za sadržaj Priloga je na Autorima, ne na Izdavaču.

Autori zadržavaju pravo da objave Prilog na svoj lični veb-sajt i na javno dostupnom serveru svojih poslodavaca. Takva objava je ograničena na nekomercijalni pristup i ličnoj upotrebi drugih, i mora jasno biti naznačeno da, time što se ističe "© Institute of Architecture and Urban & Spatial Planning of Serbia", autorska prava za ovaj Prilog imaju Institut za arhitekturu i urbanizam Srbije. Iako je dozvoljeno Autorima da ponovo upotrebe delove Rada u drugim radovima, ovo ne uključuje davanje dozvola trećoj strani da ponovo štampa, objavljuje ili neku drugu vrstu ponovne upotrebe. Izdavač mora postupati sa svim takvim zahtevima treće strane.

6. Ovaj ugovor mora biti potpisan od strane bar jednog od Autora koji je dobio saglasnost koautora tamo gde je to prikladno. Ako su Autori zaposleni i pripremali su svoj rad kao deo svog posla, prava na Prilog inicijalno pripadaju njihovom poslodavcu. U tom slučaju, kada dole potpisani potpiše ugovor o prenosu autorskih prava, Izdavač pretpostavlja da je dole potpisani ovlašćen da to učini od strane njegovog/njenog poslodavca i da je njegov/njen poslodavac pristao na sve uslove ovog ugovora.

# Digitalizacija

Za digitalizaciju koja treba da dokumente učini dostupnim za više korisnika, ako nije predviđena nacionalnim zakonom, podrazumeva se da mora da se traži dozvola od nosioca autorskih prava.

- **Neobjavljeni dokumenti su zaštićeni zakonom o autorskim pravima**, te njihovo kopiranje bez dozvole nosioca autorskih prava predstavlja kršenje zakona
- **I novine kao celina i svi članci i fotografije objavljeni u njima zaštićeni su zakonom o autorskim pravima.**
- Kada je u pitanju povezivanje dokumenata hiperlinkovima, **dozvoljeno je bez prethodne dozvole linkovati samo glavne stranice**, a za materijale koji nisu na glavnoj stranici treba tražiti dozvolu od onog ko ih je postavio na mrežu.

# Licence za elektronske publikacije

Elektronske publikacije nisu fizički objekti, te se one ne kupuju nego se plaća pristup na osnovu licenci, a one se ne kopiraju nego se umnožavaju.

O odredbama velikog broja licenci ne može se pregovarati – one su unapred zadate i korisnik, bio to pojedinac ili biblioteka, ih prihvata klikom na polje “**I agree**” prilikom pristupa elektronskom dokumentu – filmu, muzici, softveru itd.

Licencnim ugovorima koje potpisuju sa onima na čijem se serveru nalazi materijal koji im je potreban, biblioteke mogu da obezbede i prava koja prevazilaze okvira prava korišćenja prema zakonima o autorskim pravima.

## Konzorcijske licence za elektronske publikacije

**KoBSON** potpisuje ugovore sa izdavačima u ime biblioteka, te ne postoji ograničenje koliko puta će neki članak biti skinut sa sajta izdavača, već samo ograničenje da se ne može preuzeti ceo broj od korica do korica odjednom.

Kada ne bi bilo licencnog ugovora kojim je to regulisano, to bi po zakonu o autorskim pravima bila povreda prava na umnožavanje dela, jer to pravo pripada isključivo nosiocu autorskih prava.

# Nekomercijalne licence

Za korisnike je posebno značajan materijal koji je preko interneta dostupan u režimu otvorenog pristupa, ali za koji se zna ko je autor, odnosno ko preuzima odgovornost za sadržaj.

Ovakav materijal je često zaštićen nekomercijalnim licencama, kao što su na primer **GNU** ili **Creative Commons** licence.

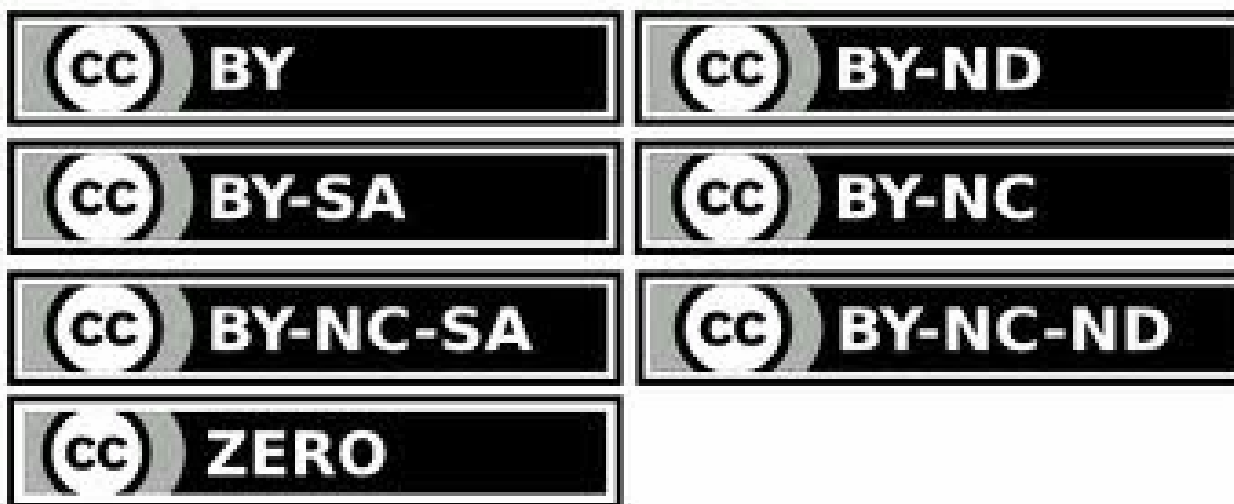

Postoji i mnogo materijala na svetskoj mreži koji nije zaštićen nikakvim licencama.

# Licence za otvoreni pristup (CC)

**Svakom je autoru u interesu da njegov rad bude dostupan što većem broju čitalaca, kako bi rezultati njegovih istraživanja imali što veći odjek, što može uticati i na napredovanje njegove karijere, a istovremeno i da mu se autorstvo prizna jer mu ono obezbeđuje naučnu reputaciju.**

#### 1. Definicije

- a. „Prerada“ je Delo u kome su prepoznatljivi karakteristični elementi prerađenog (izvornog) Dela (muzičke obrade, aranžmani, adaptacije i druge prerade). Radi otklanjanja zablude, Delo koje čini Zbirku ne smatra se Preradom, ali ako je reč o muzičkom delu ili fonogramu, istovremena sinhronizacija zvuka i slike smatraće se Preradom po ovoj Licenci.
- b. „Zbirka“ je zbirka Dela, nabrojanih u odredbi 1(f), podataka, dokumenata ili drugih nezavisnih elemenata koja, s obzirom na izbor i raspored sastavnih delova, predstavlja originalnu duhovnu tvorevinu, kao što je: antologija, enciklopedija, zbirka dokumenata ili zbirka čijim se sastavnim delovima pristupa posebno elektronskim ili drugim sredstvima (baza podataka). # Informatička revolucija

- Pojava elektronskih nosilaca informacija, interneta, svetske mreže i pretraživača, ličnih računara i „pametnih“ mobilnih telefona promenila je svet.
- Za nauku to je pre svega revolucija u načinu širenja informacija i količini raspoloživih informacionih izvora u e-obliku.
- Broj mobilnih pretplatnika jednak je broju stanovnika Zemlje i telefoni će zameniti kompjutere.

# Nauka danas

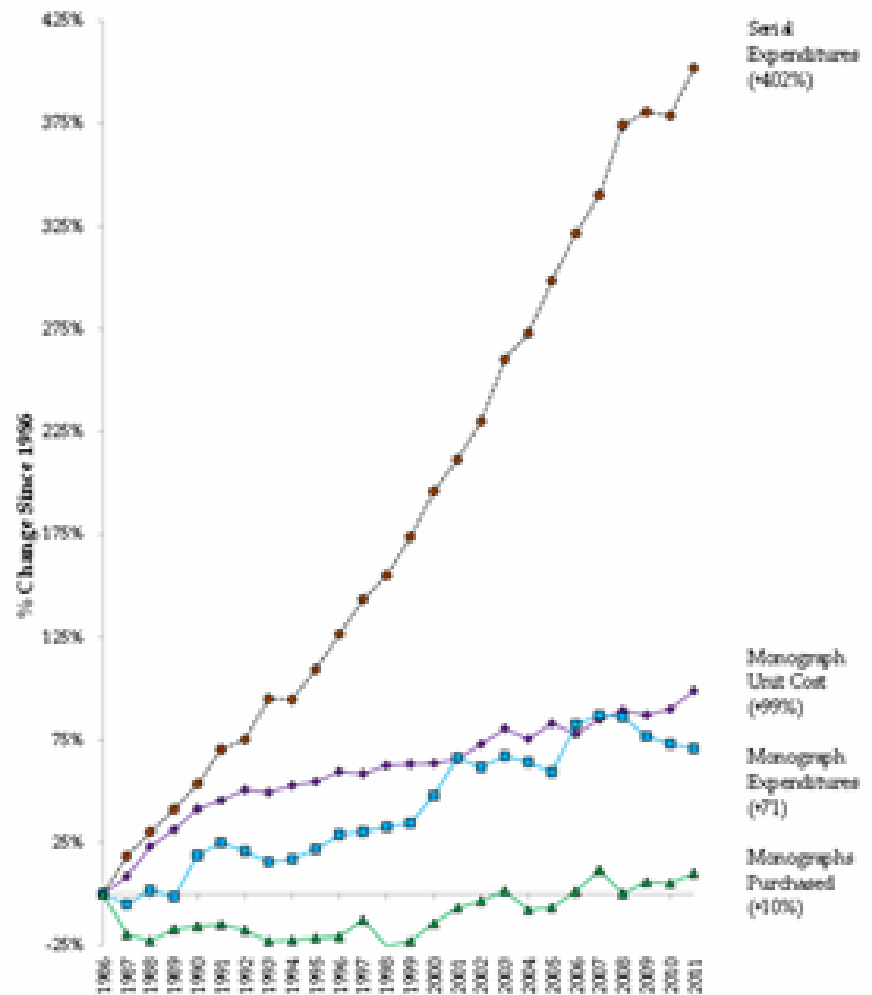

- **Broj naučnika danas prevazilazi ukupan broj svih koji su ikada stvarali**
- **Količina podataka kreiranih za poslednje dve godine je jednaka količini kreiranoj ikad**
- **Količinu prikupljenih podataka naučnici ne mogu postići da analiziraju**
- **Podaci su dostupni na vebu u mašinski čitljivoj formi u obliku teksta, multimedija, na društvenim mrežama...**
- **Mašinska analiza podataka omogućava uočavanje modela, povezivanje podataka dobijenih istraživanjima u različitim vremenima, laboratorijama i naučnim oblastima i **postojeći sistem zaštite autorstva ometa maksimalno moguć učinak.****

# Cena informacionih izvora

# Profit komercijalnih izdavača

## 2010/2011 Profits for Commercial Publishers

	<u>Profits</u>	<u>Revenues</u>	<u>Profit Margin</u>
• Elsevier	\$1.2B	\$2B	36%
• Wiley	\$106M	\$253M	42%
• Springer	\$467M	\$1.4B	34%
• Informa	\$74M	\$230M	32%
• Apple			24%
• Google			27%

# Komercijalni časopisi

**Većinu najuticajnijih časopisa, koji naučnicima donose najviše bodova objavljuje nekoliko komercijalnih izdavača (Elsevier, Springer, Wiley-Blackwell, Taylor and Francis ...), i na njima enormno zarađuju, dižući cene svake godine.**

**Pošto praktično drže monopol na “kvalitetnu” nauku, umesto servisa za širenje rezultata istraživanja, postali su kočnica jer su zbog cene nedostupni mnogima.**

# Da li je situacija prihvatljiva?

Apsurdna situacija, u kojoj na rezultatima rada naučnika koji su istraživanja vršili koristeći društvene fondove zarađuju komercijalni izdavači, dovela je do stvaranja **Pokreta za otvoreni pristup**.

Podsticaj Pokretu dali su i:

- pojava Interneta koji omogućava brz protok informacija,
- porast cena i smanjenje budžeta svetskih biblioteka.

WHY SHOULD YOU PAY TO READ THEM ?

# Otvoreni pristup

podrazumeva da svaki korisnik koji ima pristup internetu bilo gde u svetu ima pravo da čita, preuzima, čuva, štampa i koristi digitalni sadržaj radova objavljenih u otvorenom pristupu, sa jedinom obavezom da ih korektno citira.

# Otvoreni pristup

Otvoreni pristup naučnoj literaturi ostvaruje se u dva glavna, međusobno komplementarna oblika:

- **samoarhiviranjem i izgradnjom mreže institucionalnih ili disciplinarnih repozitorija, kojima se povećava dostupnost i vidljivost naučne produkcije određene institucije, ili određene naučne discipline, pri čemu je rad moguće uneti pre recenziranja (preprint), ili već recenziran i negde objavljen (postprint); (GREEN)**
- **objavljivanjem radova u časopisima koji su u otvorenom pristupu, u potpunosti ili delimično - tzv. hibridni časopisi (GOLD).**

**Pravo pristupa ne zadire u zakon o autorskom pravu, jer vlasnik autorskog prava kratkom izjavom - licencom (npr. CC licencom) daje pristanak na otvoreni pristup svom radu, s tim da mu ostaje pravo na ispravno navođenje autorstva i ona prava koja je rešio da zadrži – na primer pravo na komercijalnu eksploataciju dela.**

**Bez pristanka autora u otvorenom pristupu mogu biti samo ona dela za koja su autorska prava istekla.**

# Komercijalni izdavači i OA

Pošto su shvatili da je OA tu da ostane, komercijalni izdavači uvode mogućnost da autori plate da, u časopisu koji je inače dostupan samo preko pretplate, njihov rad bude u otvorenom pristupu.

Što je ugled i uticajnost časopisa veća, to je i cena viša. Cenu plaćaju autori ili institucije.

Bibliotečki budžeti su svuda u krizi, individualne pretplate na časopise su retkost, tako da je ovo odgovor izdavača na smanjenje profita.

# Otvoreni pristup člancima

Danas je već 10-15% naučnih časopisa u režimu otvorenog pristupa i njihov broj stalno raste, a 90% izdavača dozvoljava da autori preprinte prihvaćene za objavljivanje u njihovim časopisima postavе u digitalne repozitorijume svojih institucija (CERN, Harvard University, MIT, Berkeley, Max Planck Institute...) ili međunarodne tematske repozitorijume kao **ArXiv** (matematika, fizika, kvantitativna biologija), **PubMed Central** (biomedicina), **RePEc** (ekonomija), itd.

# Dostupnost u OA 2013.

**Istraživanje dostupnosti u otvorenom pristupu radova objavljenih od 2004. do 2011. godine, (Science-Metrix) je pokazalo da je dostignuta kritična tačka preovladavanja otvorenog pristupa i da je u više zemalja i u više naučnih oblasti broj dostupnih radova prešao 50%.**

Istraživanje je obuhvatilo 28 zemalja EU, Švajcarsku, Lihtenštajn, Island, Norvešku, Tursku, Makedoniju, Izrael, Brazil, Kanadu, Japan i SAD i 22 naučne oblasti.

Preko 50% članaka bilo je u otvorenom pristupu u više zemalja, i to u oblasti nauke i tehnologije, biomedicinskih istraživanja, biologije, matematike i statistike.

Većina finansijera naučnih istraživanja prihvatila je i objavljivanje u časopisima sa otvorenim pristupom ili hibridnim i arhiviranje u digitalnim repozitorijumima. Preko 75% radova je imalo embargo period pre puštanja u otvoreni pristup od 6 do 12 meseci.

# Finč izveštaj za vladu Velike Britanije

Izveštaj dokazuje da je «zlatni» put isplativiji od «zelenog», pokazujući jasne znake lobiranja izdavačke industrije da glavna strategija prema sveopštem otvorenom pristupu informacijama treba da ide preko komercijalnih časopisa, a da se novac za to obezbedi iz fondova za istraživanje. «Zeleni» pristup, koji ne košta ništa osim truda autora da postave svoj rad u repozitorijum i novaca za održavanje ovakvih repozitorijuma, proskribovan je kao dodatni trošak, koga ne bi bilo kada bi svi komercijalni časopisi bili u otvorenom pristupu, i to naplatili od autora.

**Welcome**

Author Services offers **many benefits** to journal authors, including:

- Single sign-on with Wiley Online Library. Create one account and use it on both sites.
- Find the journal that's right for your article.
- Track your accepted article through production (most journals).
- Free access to your published article and ability to nominate colleagues to receive free access (most journals).

Following are a **few tips** for using Author Services:

- To submit an article to a ScholarOne Manuscripts site, you will need to create a separate account on that site.
- When an article is accepted, the corresponding author receives an e-mail with a unique code and link. Logging in to Author Services with the same e-mail address where the alert is received automatically connects the author to the article. Alternatively, authors may register with any e-mail address: use the "add article" feature and enter the unique code contained in the initial e-mail to connect to the article. There may be a short delay from when the article is accepted by the journal and when it has been received at Wiley-Blackwell.
- Corresponding authors can sign in and provide co-authors' e-mail addresses; this enables co-authors to track their articles and receive free access to the final, published version.

Journal Author Academy: Now With Interactive Courses

Welcome to the Expanded Journal Author Academy, a guide from Springer and Edanz on writing and publishing.

For those of you interested in more thorough study, we have now introduced courses including interactive features like quizzes and certificates.

You can use the links to the right or below to find advice on specific topics and links to the courses.

How to write and submit a journal article

Publishing a journal manuscript

**Why publishing your work is important**

Before you begin, it may be useful to remind yourself of why publishing your work is important. You might need to publish in order to graduate, get a job, or advance your career. But first take a moment to think about two of the most important aims of scientists:

To add to the body of human knowledge

To help yourself and others understand the nature of the universe

You can't accomplish these goals without publishing! After all, the main way that others learn about your work is through your published articles. If you don't publish, other researchers can't build on your work; it will be as if you never did the research.

In other words: **Your research is NOT complete until it has been published**

Beall's List:

**Potential, possible, or probable predatory scholarly open-access publishers**

This is a list of questionable, scholarly open-access publishers. We recommend that scholars read the available reviews, assessments and descriptions provided here, and then decide for themselves whether they want to submit articles, serve as editors or on editorial boards. The criteria for determining predatory publishers are [here](#).

We hope that tenure and promotion committees can also decide for themselves how importantly or not to rate articles published in these journals in the context of their own institutional standards and/or geocultural locus. We emphasize that journal publishers and journals change in their business and editorial practices over time. This list is kept up-to-date to the best extent possible but may not reflect sudden, unreported, or unknown enhancements.

## About the Author

### Jeffrey Beall

I work as a librarian at Auraria Library, University of Colorado Denver, in Denver, Colorado.

An academic librarian for over 22 years, I have published extensively in the areas of metadata, full-text searching, and information retrieval.

My interest in scholarly open-access publishing began in 2009 when I reviewed the publisher [Bentham Open](#) in *The Charleston Advisor*, a journal that reviews electronic resources.

Previously, I served on the editorial board of *Cataloging & Classification Quarterly*, an experience that, in addition to my own research and writing, helped me learn a lot about scholarly communication. My service on this editorial board ended in December, 2012.

A full list of my publications is available on my [website](#). In 2012 I was awarded tenure and promoted to associate professor.

My email address is [jeffrey.beall@ucdenver.edu](mailto:jeffrey.beall@ucdenver.edu).

**General principles**

RePEc (Research Papers in Economics) is a collaborative effort of hundreds of volunteers in 76 countries to enhance the dissemination of research in Economics and related sciences. The heart of the project is a decentralized bibliographic database of working papers, journal articles, books, books chapters and software components, all maintained by volunteers. The collected data is then used in various services as described below.

So far, over 1500 archives from 76 countries have contributed about 1.4 million research pieces from 1,700 journals and 3,700 working paper series. Over 35,000 authors have registered and 70,000 email subscriptions are served every week. See below on how you can be part of this initiative.

**RePEc services**

The following are services that use (principle) and contribute RePEc data. They also report usage statistics that can be used towards the RePEc rankings.

	<a href="#">RePEc Author Service</a>	Author registration and maintenance of a profile on RePEc.
	<a href="#">Munich Personal RePEc Archive</a>	Authors in institutions lacking a participating RePEc archive can submit their papers to MPRA and get them included in the RePEc database.
